H.3. Organic farming

Brussels, 03. 02. 2012  
AGRI H3/SC/sm agri.ddg3.h.3(2012)84853

Dear

Thank you for your e-mail of 19 January 2012 asking where it is possible to find a list for a list of products (trade marks) permitted in organic farming, such as fertilisers, soil conditioners and pesticides.

I would reply by saying that in Commission Regulation (EC) No 889/2008<sup>1</sup> you will find several technical Annexes listing the substances that may be used in organic production under the conditions fixed by Regulation (EC) No 834/2007<sup>2</sup> and Regulation (EC) No 889/2008. In particular, you will find in Annex I and Annex II the substances that may be used as fertilizers and soil conditioners and plant protection products.

As regards to formulations I would advise you to refer to the Competent authorities dealing with organic production in the Member States.

Jean-François HULOT

Contact: Stefano Cinti, Telephone: 88576
