Box 14/15: Container No / Seal No	. 8
Box 16: Total gross weight	. 8
Box 19: Customs warehousing/inward processing	. 8
Multi-lingual PDF	. 9
Initiate extract by RFL	10

# **Updated authority roles**

The authorities were reorganised to prepare for the inclusion of new certificates in TRACES NT. A new user requesting access to TRACES NT for COI no longer has to request a role as CAOPL (Competent authority for production and labelling) or CAFOP (Competent authority for organic produce).

The authority roles are now as follows: CCA – Central Competent Authority and BCP – Border Control Post. In order to define which authority can access a certificate one or several authority domains are assigned to an authority role. An authority can have one or several roles and the authority domains relevant for COI are:

- OPL Organic Production and Labelling: The domain takes over the functions formerly assigned to the CAOPL
- EAOC Endorsing Authority for Organic Certification: The domain takes over the functions formerly assigned to the CAFOP
- OC Organic Control: This domain is attributed to national authorities from third countries.

## Changed handling of management for the validation user's role requests

For users authorised to validate other user's role requests the handling of these has slightly changed. The validation of the main user's profile has been removed. From now on the validation of a role request is enough.

When you click on the 'Search pending requests' button on the user search, you can clearly see from the search results, if the user can access certificates or not.

Search User	rs			Rearch pending requests
	Search: Search by fir	st name, last name or email address		Advanced search >
Full name <b>↓</b> ‡	Account name	Bodies		Last Login
	nkrzywad ¥No access.	Authority OC TOWAROWY PORT LOTNICZY PYRZOWICE CO PL331040	Requested	March 29, 2017 01:29:34 +02:00 CEST 15 days ago.
	nleardad X No access.	Operator SA PLANTES AROMATIQUES DU DIOIS Operator SA PLANTES AROMATIQUES DU DIOIS	Requested	March 27, 2017 10:07:30 +02:00 CEST 17 days ago.
_	nlaudeag * No access.	Operator CADES Operator CADES	Requested	January 9, 2017 15:01:28 +01:00 CET 3 months ago.

A user profile that has no validated roles is clearly marked with a red 'no access'-badge

A user can have a valid and a requested role at the same time. In this case, no 'no access'-badge is displayed. But you can see from the status of the user's bodies, which role is valid and which one is requested

Endorsing Authority USER n SEVEN	nusendor	Authority Le raizet bureau BCP FR006330	Requested	April 11, 2017 14:55:17 +02:00 CEST 2 days ago.	0
		Authority Le Havre Port bureau BCP FR002300	Valid		

To validate the user's request, click on the user's name to open the profile, click on the tick button behind the requested role and on the save button on top of the page – a blue information box above the details reminds you to do so. The 'no access'-badge disappears and is replaced by a green badge confirming the user has access. The green badge is only visible inside the users' details, not in the search list. A user without a 'no access'-badge in the search list has access to the system – which certificate(s) the user can access still depends on the validated roles.

## **COI certificate**

Several updates have been made to the COI certificate. The changes were necessary in order to reflect the changes made to the certificate and the extract certificate in Regulation (EU) 2016/1842. (The new certificate will be applicable from 19 April 2017 onwards. The use of TRACES will be mandatory six months later on 19 October 2017.)

## Serial number of the certificate of inspection

The country code in the serial number of the certificate has been changed. Before the release it reflected the country where the Control Body/Authority is based. <u>Now it reflects the country of the exporter.</u>

#### **Box 9: Country of clearance/Point of entry**

The point of entry has been added to box 9. In addition to the country of clearance this is now mandatory for the submission of a new COI.

9. Cou	ntry of clearance / Point of entry		
Count	ry E Spain 28002 Madrid	ISO Code ES	

#### **Purpose box – below box 12**

A box to indicate the purpose of a certificate has been added. In this box, the decision is indicated, if the consignment will be shipped to one (first) consignee, or if it will be released in batches (base for extract). When the option 'To first consignee' is selected, box 12 'First consignee in the Union' needs to be completed. When the option 'To be released in batches (base for extract)' is selected, Box 12 will not be editable and information added there before will be deleted.

The tick box from the box to be signed by the endorsing authority has consequently been removed.

The purpose box is located under the first consignee box on the COI certificate screen

11. Importer	12. First Consignee in the Union
Name  Do-It Country Netherlands ISO Code NL	Name Do-It Country Netherlands ISO Code NL
Purpose To first consignee To be released in batches (base for extract)	

#### The box to be signed by the endorsing authority - now without 'base for extract' selection

Conclusion	Clearable	Clearable as Conventional	Not Clearable	
Date of signature	Relevant Authority Person			Signature
	Authority			
	Quality			
	Address			
	Country		ISO Code	

**Please note:** Like before, the decision whether or not the consignment will be split becomes mandatory only when the endorsing authority signs the certificate. At the steps before (when the importer submits the certificate to the issuing body or the issuing body signs the declaration) the provision of the information is optional.

#### New Box: Responsible for the load

A box has been added, where the name of a responsible for the load (freight forwarder) can be added.

he responsible fo	or the load box is optional and the	operator added in this b	box doesn't nee	ed to be an organic	operator
Responsible for the loa	d				C
Name 🕅	RFL Test II			Gr Edit	**
Country	Belgium	ISO Code	BE	Q Advanced	
				🗂 Clear	

Please note: Information added in this field will not be visible in the PDF version of the certificate.

The activity 'Responsible for the load' can be added to any operator via the Organization > Operators menu, or to a new operator created by a new user when requesting a role.

At the time the operator is created as 'Responsible for the load', the activity needs to be associated to an authority or entry post

erators rch, modify, register n. w	Operator Details		Operator Activities		- 💉 🦨 🕂 Add Add

### **Document upload in COI and Extract COI**

An extra field has been added to the COI certificate and the extract COI, providing the possibility of uploading additional documents. Every uploaded document is checked by an anti-virus programme

#### The user can choose from different document types

Supporting documents

Several documents can be added and viewed by different actors. The documents are only available in the TRACES NT application and will not automatically be printed with the PDF version of the COI certificate. You have to download them separately.

## **Box 13: Description of products**

In addition to the trade name, package count, net weight, producer and certifying body a <u>lot number</u> can now be added to the product description. Adding the information is optional.

13. Description of products						*
		+ Add commodity	Modify commodities			
1 07 EDIBLE VEGETABLES AND 0702 00 00 Tormatoes, fresh Trade name	CERTAIN ROOTS AND TO or chilled	UBERS Package count *	Net weight *	Producer (from box 5) * Kg Q Select ★-	e Commodity Clear Desi Certified by (from box 6) *	riptors + •

## Box 14/15: Container No / Seal No

The order of the container number and seal number in Box 14/15 has changed. The container number now comes first.

14./15. Container No / Seal No		ľ
Container number	Seal number	
		-
Format: Explanation ABCU0000000		
Fill last entries with seal / container numbers to add a new	row.	Remove All

## Box 16: Total gross weight

The new Box 16 for the total gross weight of the products has been added. The information is mandatory and the amount added needs to be equal to or above the total weight of all the net weights per commodities summed up.

16. Total gross weight	*	
	Unit -	

## Box 19: Customs warehousing/inward processing

In the new Box 19 additional information can be provided, if the products are designated for customs warehousing or inward processing. The customs operator added to the field needs to be an organic operator. When the operator is selected, the information about their control body or authority is automatically added.

#### The completed box 19 displays the customs operator and their control body/authority

Customs operator	Name 🕐	COMERCIAL JAVIER CASADO		
	Country	🚾 Spain		ISO Code ES
		000		
ontrol Body or Control Authority	Name	CAECYL – CONSEJO DE AGRICULTURA ECOLÓGICA DE CASTILLA Y LEÓN	Code	ES-ECO-016-CL
	Country	💶 Spain	SO Code ES	
		000		
Customs Declaration Reference Number		123654		
				Customs procedure initiated

## **Multi-lingual PDF**

The PDF version of a COI certificate can now be printed in several languages at the same time.

## 😫 Preview PDF

Clicking on the button with the three dots next to the 'Preview PDF' button will open the language selection.

Advanced Print Options		56 <sup>y</sup> '

		Print PDF Close

Several languages can be selected. Clicking the 'Print PDF' icon will open the document

At the bottom of the PDF, the languages of the print version, the certificate's URL and a continuous page numbering are displayed – the PDF version of this certificate is only valid, if all the 8 pages in all 4 languages are presented at the same time

<b>en</b> / de / es / fr	https://webgate.acceptance.ec.europa.eu/tracesnt/certificate/coi/COLMX.2017.0000006	1/8

## Initiate extract by RFL

A user with a role valid as an operator defined as 'responsible for the load' has access to a COI certificate and can issue an extract COI, if the name of his organization has been inserted in the responsible for the load box of the underlying COI certificate.
